

DELTA ANNOUNCES FLEET EXPANSION

ATLANTA, GA, June 24, 1987....Delta Air Lines announced today an agreement with the McDonnell Douglas Corporation to increase the Delta order for MD-88 aircraft. The agreement now provides for 30 firm orders and 80 options. The number of options represents an increase of 20 aircraft over the original agreement, bringing the total number of aircraft involved to 110. The first eight of the original 30 firm orders have been delivered and are in service. Passenger and employee acceptance of the aircraft has been exceptional, along with a good mechanical reliability. The balance of the firm orders and options is scheduled for delivery by the end of 1992.
